OMNISTAR STEPS IN TO ENSURE SEAMLESS SERVICE FOR FARMSCAN CUSTOMERS

OmniSTAR has provided assurances to Farmscan customers that it will provide a stop gap service, after Computronics Corporation Limited went into administration recently.

Electronics manufacturer Computronics, a reseller of OmniSTAR services was placed in voluntary administration in April, with plans to sell off its Farmscan division. As a result, a number of the organisation's many customers were left with uncertainty surrounding their signal licence subscriptions.

OmniSTAR's Business Development Manager Geoff Glazier said OmniSTAR was stepping in to help minimise the impact to customers.

"We have pledged to do everything we can to ensure services provided by OmniSTAR will continue without any disruption."

"With a large international presence, customers have always been able to rest assured that our coverage and service will be delivered with precision, accuracy and absolute reliability.

"OmniSTAR has served Australian agricultural customers since 1994 and is committed to maintaining the high quality service, regardless of extenuating factors," he said.

OmniSTAR will be personally contacting those who may be affected in the coming days, though anyone with queries is invited to call OmniSTAR directly on 08 9322 5295 or 1800 062 221.
